FOXTEL

Cast from your device to the TV

The TV in this room gives you the option to cast content from your mobile device. So if you've got stored video or a streaming service on your laptop, phone or tablet, here's how you can watch it on the big screen:

1. Turn the TV on

2. Select Casting

3. Scan the QR code on the TV screen to connect your device to the casting Wi-Fi (e.g. Room0505)

   The browser should open to vucaster.tv, where you can enter the PIN number on the TV screen. If the browser does not open automatically, proceed to step 4.

4. Type vucaster.tv into your device's browser and enter the PIN number from the TV screen

5. Open the streaming app you want to cast from on your device. Find ⬚ and then select the Chromecast for your room (e.g. Room0505)

6. Select the content you want to watch from the streaming app and press play.

   If you have any issues casting, scan this code for a video demonstration

Note: If you navigate from casting, you may end your casting session and have to log back in.
